

Hunger Cues

Babies show several cues in readiness for breastfeeding. Tuning into your baby's cues will make your feeding more successful and satisfying for both your baby and for you. Your baby does not have to cry to let you know he is hungry. Crying is the last hunger cue!

Awakening

Soft sounds

Mouthing (licking lips, sticking tongue out, licking lips)

Rooting towards the breast (turning the head and opening the mouth)

Hand to mouth activity

Crying beginning softly and gradually growing in intensity

Try to catch your babies feeding cues early in the cycle – avoid crying – and begin breastfeeding!
